iPads for Learning - Unlocking Your Child's Academic and Personal Potential

Dear Parent/Carer,

I am delighted to invite you to join an information session to find out about iPads for Learning - an exciting approach that will maximise your child's progress and create inspiring learning experiences.

The information sessions take place live on Tuesday 25th and Wednesday 26th May, 6.15pm to 7.00pm. At the sessions, you will:

- learn how iPads are used as part of our Windsor Academy Trust curriculum to maximise teaching, learning, achievement and personal development
- understand the success and impact of iPads for learning
- gain practical information about finance, insurance, e-safety and the supply of iPads.

You only need to attend one session and can **book your place at** windsoracademytrust.org.uk/ipads - If you need help booking, please contact your school.

The session is an invaluable source of information on iPads for Learning which will significantly enhance your child's future learning experience, and we hope you can attend.

If you cannot attend the live session, a recording will be made available to you following the event. Please do still register to let us know that you cannot attend so that we can share the recording with you after the session.

About iPads for Learning

iPads for Learning provides individual iPads for all Year 9 students. Part of our commitment to delivering a world class education, iPads for Learning ensures that your child has access to the most impactful way to learn and progress both in school and at home and develops the essential digital skills they need for their future.

You can find out more about iPads for Learning and how it has transformed our teaching and learning in a short video featuring students, staff and parents. You can watch the video at windsoracademytrust.org.uk/ipads

We launched iPads for Learning last year following significant investment in technology and extensive research that showed the positive impact of digital technology in education. Due to its success, we are now expanding iPads for Learning to more year groups across our schools.

The use of iPads is fully integrated into our Windsor Academy Trust curriculum, with your child being able to use their iPad in lessons and at home as part of their learning. Your child's iPad will form part of their essential equipment to maximise their engagement, learning and progress.

What we are asking of you

The success of this project is dependent on a partnership with parents. We are not able to provide iPads to students from the schools' budget. We are therefore looking for a contribution from parents to fund the purchase of iPads.

Details about the finances involved in this project will be outlined at the information session. Following this, if you have any further questions or would like to talk this through with the school directly, the school will make time to discuss this with you.

Thank you in advance for your support.

Yours sincerely

Dawn Haywood

Deputy CEO and Education Director, Windsor Academy Trust
